# **Information Gathering: Interactive Methods**

4

cuu duong than cong . com

# Systems Analysis and Design, 7e Kendall & Kendall

© 2008 Pearson Prentice Hall

## Objectives

- Recognize the value of interactive methods for information gathering
- Construct interview questions to elicit human information requirements
- Structure interviews in a way that is meaningful to users
- Understand the concept of JAD and when to use it
- Write effective questions to survey users about their work
- Design and administer effective questionnaires

Kendall & Kendall than Cong.com https://fb.com/tailieudientucntt 4-2

# Interactive Methods to Elicit Human Information Requirements

- Interviewing
- Joint application design (JAD)
- questionnaires

cuu duong than cong . com

Kendall & Kendall hanCong.com https://fb.com/tailieudientucntt 4-3

# **Major Topics**

- Interviewing
  - Interview preparation
  - Question types
  - Arranging Questions
  - The interview report
- Joint Application Design (JAD)
  - Involvement
  - location
- Questionnaires
  - Writing questions than cong.com
  - Using Scales
  - Design
  - Administering

Kendall & Kendall hanCong.com https://fb.com/tailieudientucntt

# Interviewing

- Interviewing is an important method for collecting data on human and system information requirements
- Interviews reveal information about:
  - Interviewee opinions
  - Interviewee feelings
  - Goals duong than cong . com
  - Key HCI concerns

Kendall & Kendall than Cong.com https://fb.com/tailieudientucntt 4-5

## **Interview Preparation**

- Reading background material
- Establishing interview objectives
- Deciding whom to interview
- Preparing the interviewee
- Deciding on question types and structure

Kendall & Kendall & Kendall hanCong.com https://fb.com/tailieudientucntt

# **Question Types**

- Open-ended
- Closed

cuu duong than cong . com

cuu duong than cong . com

Kendall & Kendall thanCong.com https://fb.com/tailieudientucntt

## **Open-Ended Questions**

- Open-ended interview questions allow interviewees to respond how they wish, and to what length they wish
- Open-ended interview questions are appropriate when the analyst is interested in breadth and depth of reply

Kendall & Kendall https://fb.com/tailieudientucntt

# Advantages of Open-Ended Questions

- Puts the interviewee at ease
- Allows the interviewer to pick up on the interviewee's vocabulary
- Provides richness of detail
- Reveals avenues of further questioning that may have gone untapped

Kendall & Kendal

# Advantages of Open-Ended Questions (Continued)

- Provides more interest for the interviewee
- Allows more spontaneity
- Makes phrasing easier for the interviewer
- Useful if the interviewer is unprepared

# Disadvantages of Open-Ended Questions

- May result in too much irrelevant detail
- Possibly losing control of the interview
- May take too much time for the amount of useful information gained
- Potentially seeming that the interviewer is unprepared
- Possibly giving the impression that the interviewer is on a "fishing expedition"

# Closed Interview Questions

- Closed interview questions limit the number of possible responses
- Closed interview questions are appropriate for generating precise, reliable data that is easy to analyze
- The methodology is efficient, and it requires little skill for interviewers to administer

Kendall & Kendall kendall hanCong.com https://fb.com/tailieudientucntt 4-12

# Benefits of Closed Interview Questions

- Saving interview time
- Easily comparing interviews
- Getting to the point
- Keeping control of the interview
- Covering a large area quickly
- Getting to relevant data

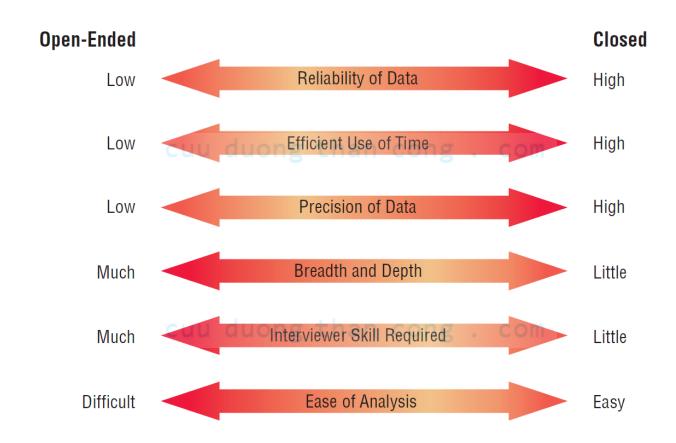

Kendall & Kendall hanCong.com https://fb.com/tailieudientucntt 4-13

# Disadvantages of Closed Interview Questions

- Boring for the interviewee
- Failure to obtain rich detailing
- Missing main ideas
- Failing to build rapport between interviewer and interviewee

Kendall & Kendall hanCong.com https://fb.com/tailieudientucntt 4-14

# Figure 4.5 Attributes of Openended and closed questions

## **Bipolar Questions**

- Bipolar questions should be used sparingly
- A special kind of closed question

Kendall & Kendall than Cong.com https://fb.com/tailieudientucntt 4-16

### **Probes**

- Probing questions elicit more detail about previous questions
- The purpose of probing questions is:
  - To get more meaning
  - To clarify
  - To draw out and expand on the interviewee's point
- May be either open-ended or closed

## **Arranging Questions**

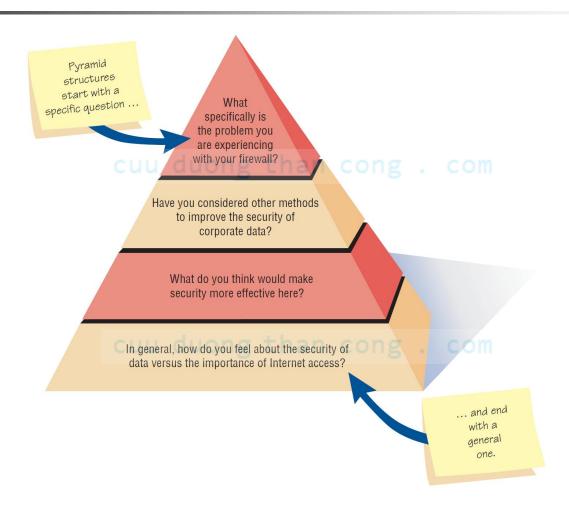

- Pyramid
  - starting with closed questions and working toward open-ended questions
- Funnel
  - starting with open-ended questions and working toward closed questions
- Diamondu duong than cong . com
  - starting with closed, moving toward open-ended, and ending with closed questions

Kendall & Kendall than Cong.com https://fb.com/tailieudientucntt 4-18

## Pyramid Structure

- Begins with very detailed, often closed questions
- Expands by allowing open-ended questions and more generalized responses
- Is useful if interviewees need to be warmed up to the topic or seem reluctant to address the topic

# **Figure 4.7** Pyramid structure for interviewing goes from specific to general questions

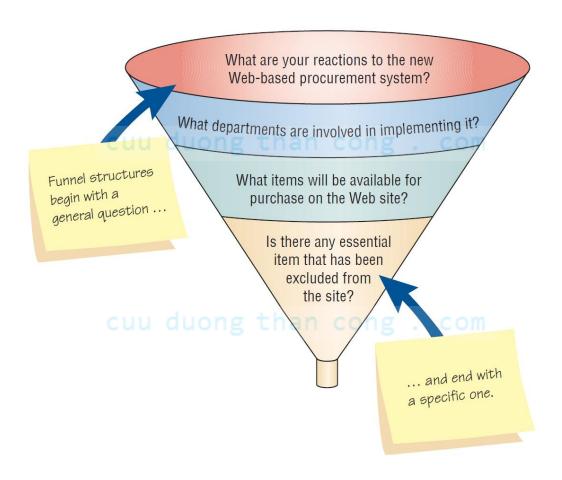

### **Funnel Structure**

- Begins with generalized, open-ended questions
- Concludes by narrowing the possible responses using closed questions
- Provides an easy, non-threatening way to begin an interview
- Is useful when the interviewee feels emotionally about the topic

Kendall & Kendall kendal fran Cong.com https://fb.com/tailieudientucntt 4-21

# **Figure 4.8** Funnel structure for interviewing begins with broad questions then funnels to specific questions

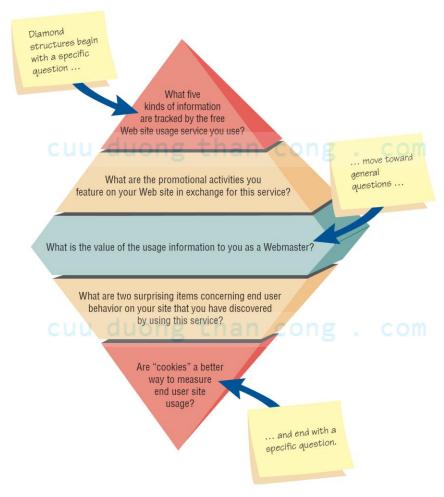

#### **Diamond Structure**

- A diamond-shaped structure begins in a very specific way
- Then more general issues are examined
- Concludes with specific questions
- Combines the strength of both the pyramid and funnel structures
- Takes longer than the other structures

Kendall & Kendall thanCong.com https://fb.com/tailieudientucntt 4-23

# **Figure 4.9** Diamond-shaped structure for interviewing combines the pyramid and funnel structures

Kendall & Kendall Kend

# Closing the Interview

- Always ask "Is there anything else that you would like to add?"
- Summarize and provide feedback on your impressions
- Ask whom you should talk with next
- Set up any future appointments
- Thank them for their time and shake hands

## **Interview Report**

- Write as soon as possible after the interview
- Provide an initial summary, then more detail
- Review the report with the respondent

cuu duong than cong . com

# Joint Application Design (JAD)

- Joint Application Design (JAD) can replace a series of interviews with the user community
- JAD is a technique that allows the analyst to accomplish requirements analysis and design the user interface with the users in a group setting

Kendall & Kendall than Cong.com https://fb.com/tailieudientucntt 4-27

# Conditions that Support the Use of JAD

- Users are restless and want something new
- The organizational culture supports joint problem-solving behaviors
- Analysts forecast an increase in the number of ideas using JAD
- Personnel may be absent from their jobs for the length of time required

Kendall & Kendall hanCong.com https://fb.com/tailieudientucntt 4-28

### Who Is Involved

- Executive sponsor
- IS Analyst
- Users
- Session leader
- Observersong than cong. com
- Scribe

Kendall & Kendall than Cong.com https://fb.com/tailieudientucntt 4-29

## Where to Hold JAD Meetings

- Offsite
  - Comfortable surroundings
  - Minimize distractions
- Attendance
  - Schedule when participants can attend
  - Agenda duong than cong.com
  - Orientation meeting

### Benefits of JAD

- Time is saved, compared with traditional interviewing
- Rapid development of systems
- Improved user ownership of the system
- Creative idea production is improved

Kendall & Kendall kendal francong.com https://fb.com/tailieudientucntt 4-31

# Drawbacks of Using JAD

- JAD requires a large block of time to be available for all session participants
- If preparation or the follow-up report is incomplete, the session may not be successful
- The organizational skills and culture may not be conducive to a JAD session

Kendall & Kendall thanCong.com https://fb.com/tailieudientucntt 4-32

### Questionnaires

Questionnaires are useful in gathering information from key organization members about:

- Attitudes
- Beliefs
- Behaviors ong than cong com
- Characteristics

Kendall & Kendall francong.com https://fb.com/tailieudientucntt 4-33

# Planning for the Use of Questionnaires

- Organization members are widely dispersed
- Many members are involved with the project
- Exploratory work is needed
- Problem solving prior to interviews is necessary

Kendall & Kendall francong.com https://fb.com/tailieudientucntt 4-34

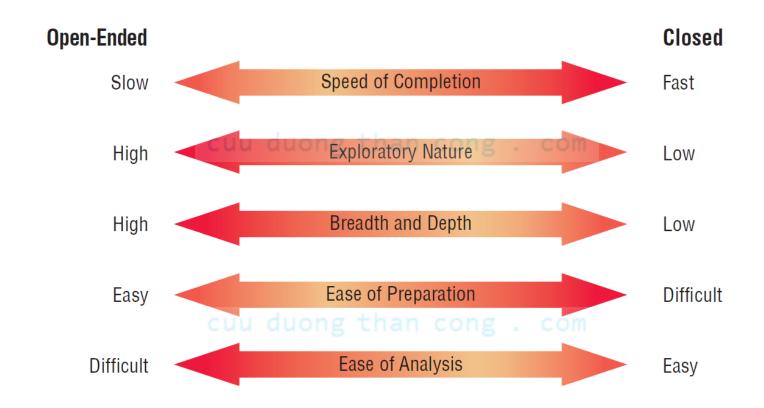

## **Question Types**

#### Questions are designed as either:

- Open-ended
  - Try to anticipate the response you will get
  - Well suited for getting opinions
- Closed
  - Use when all the options may be listed
  - When the options are mutually exclusive

Kendall & Kendall than Cong.com https://fb.com/tailieudientucntt 4-35

# **Figure 4.12** Trade-offs between the use of open-ended and closed questions on questionnaires

Kendall & Kendall thanCong.com https://fb.com/tailieudientucntt 4-36

## Questionnaire Language

- Simple
- Specific
- Short
- Not patronizing
- Free of bias
- Addressed to those who are knowledgeable
- Technically accurate
- Appropriate for the reading level of the respondent

#### Measurement Scales

- The two different forms of measurement scales are:
  - Nominal duong than cong . com
  - Interval

cuu duong than cong . com

#### **Nominal Scales**

- Nominal scales are used to classify things
- It is the weakest form of measurement
- Data may be totaled

```
What type of software do you use the most?
```

1 = Word Processor com

2 = Spreadsheet

3 = Database

4 = An Email Program

#### **Interval Scales**

- An interval scale is used when the intervals are equal
- There is no absolute zero
- Examples of interval scales include the Fahrenheit or Centigrade scale

```
How useful is the support given by the Technical Support Group?

NOT USEFUL

AT ALL

1 2 3 4 5
```

Kendall & Kendall kendal francong.com https://fb.com/tailieudientucntt 4-40

## Validity And Reliability

- Reliability of scales refers to consistency in response—getting the same results if the same questionnaire was administered again under the same conditions
- Validity is the degree to which the question measures what the analyst intends to measure

#### **Problems with Scales**

- Leniency
- Central tendency
- Halo effect

cuu duong than cong . com

Kendall & Kendall kendal https://fb.com/tailieudientucntt 4-42

## Leniency

- Caused by easy raters
  - Solution is to move the "average" category to the left or right of center

cuu duong than cong . com

Kendall & Kendall kendal https://fb.com/tailieudientucntt 4-43

## **Central Tendency**

- Central tendency occurs when respondents rate everything as average
  - Improve by making the differences smaller at the two ends
  - Adjust the strength of the descriptors
  - Create a scale with more points

#### Halo Effect

- When the impression formed in one question carries into the next question
- Solution is to place one trait and several items on each page

cuu duong than cong . com

## Designing the Questionnaire

- Allow ample white space
- Allow ample space to write or type in responses
- Make it easy for respondents to clearly mark their answers
- Be consistent in style

## Order of Questions

- Place most important questions first
- Cluster items of similar content together
- Introduce less controversial questions first

cuu duong than cong . com

# **Figure 4.13** When designing a Web survey, keep in mind that there are different ways to capture responses

Name	Appearance	Purpose
One-line text box		Used to obtain a small amount of text and limit the answer to a few words
Scrolling text box	cuu duon	Used to obtain one or more paragraphs of text
Check box	Е	Used to obtain a yes-no answer (e.g., Do you wish to be included on the mailing list?)
Radio button	િ	Used to obtain a yes-no or true-false answer
Drop-down menu	d <u>I</u> u duong 1	Used to obtain more consistent results (Respondent is able to choose the appropriate answer from a predetermined list [e.g., a list of state abbreviations])
Push button	Button	Most often used for an action (e.g., a respondent pushes a button marked "Submit" or "Clear")

Kendall & Kendall https://fb.com/tailieudientucntt 4-48

## Methods of Administering the Questionnaire

- Convening all concerned respondents together at one time
- Personally administering the questionnaire
- Allowing respondents to self-administer the questionnaire
- Mailing questionnaires
- Administering over the Web or via email

Kendall & Kendall https://fb.com/tailieudientucntt 4-49

## Electronically Submitting Questionnaires

- Reduced costs
- Collecting and storing the results electronically

cuu duong than cong . com

### Summary

- Interviewing
  - Interview preparation
  - Question types

  - The interview report
- Joint Application Design (JAD)
  - Involvement and location
- Questionnaires
  - Writing questions
  - Using Scales and overcoming problems
  - Design and order
  - Administering and submitting
